

CAMMUNITY DAO LLC

Legally formed as a Wyoming DAO LLC in July 2025

Camuverse: Powered by Creator Token Decentralized Subscriber Gating (CTDSG).

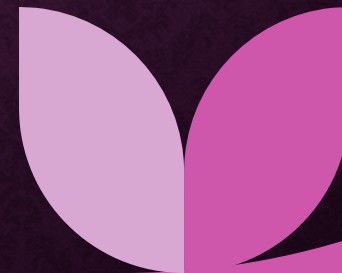

EMPOWERING CREATORS THROUGH DECENTRALIZED MONETIZATION

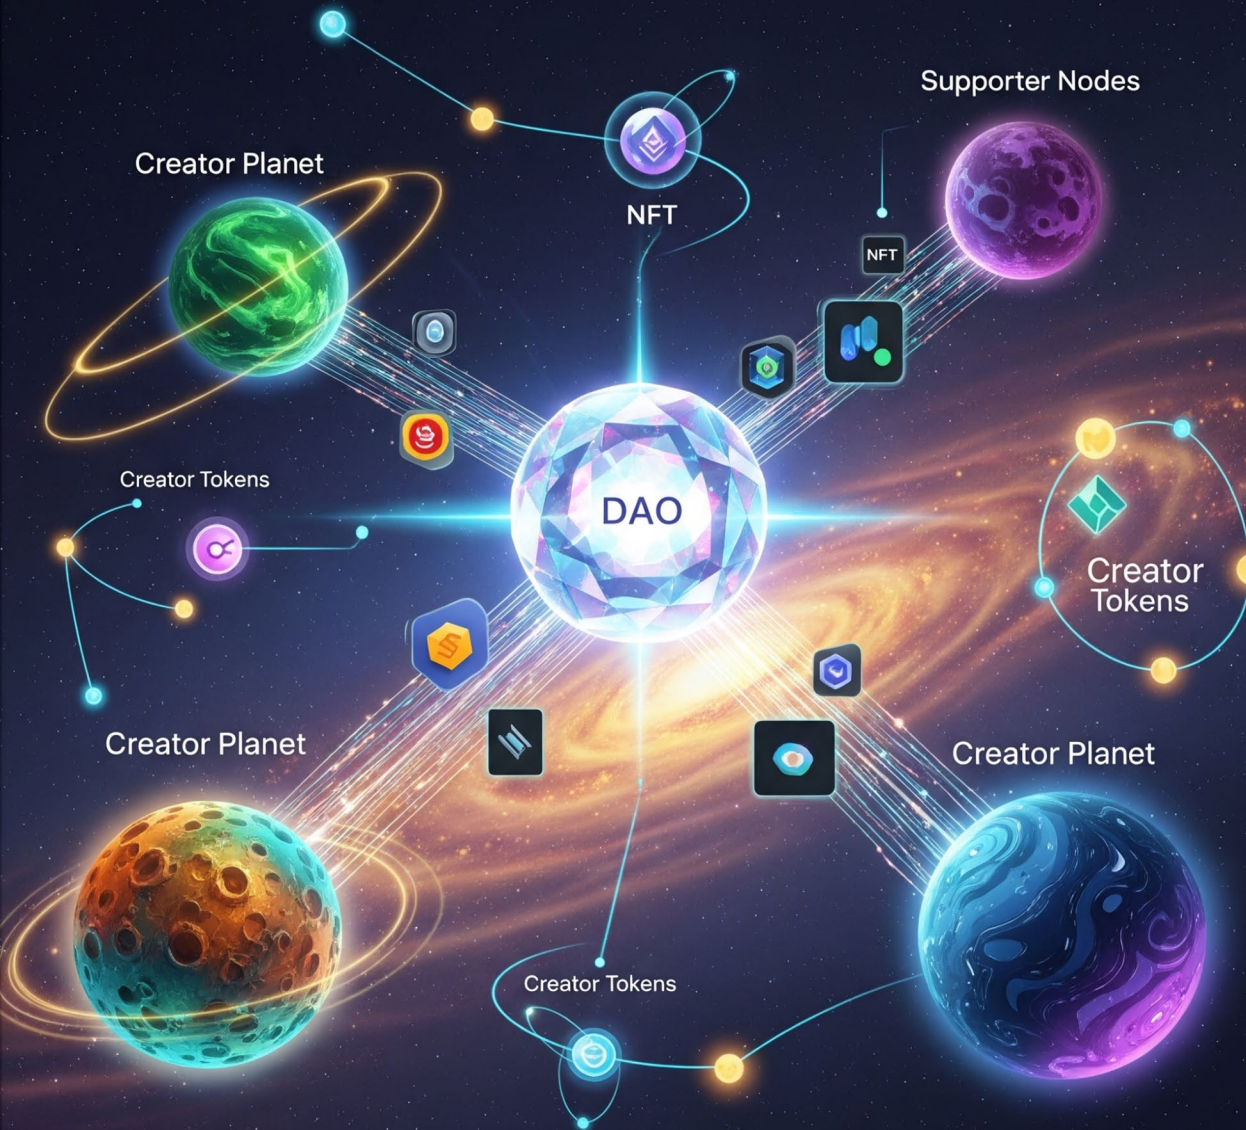

CammunityDAO is a decentralized video monetization and engagement platform for creators of all types with optional gated access, allowing creators to control access to their content. It is not exclusively adult-oriented but is inclusive of various content types, catering to a diverse user base.

With optional gated access, creators can choose how to monetize and control access to their content — ensuring both freedom of expression and audience safety.

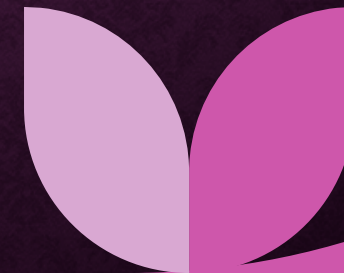

CAMUVERSE

CAMMUNITY MISSION & CAMUVERSE.IO VISION

To create a decentralized and inclusive ecosystem, the “Camuverse,” where creators of all types can monetize their content, engage with their audience, and have a say in the platform’s development through DAO governance.

The camuverse introduces a paradigm shift in digital access and monetization, anchored in Creator Token Decentralized Subscriber Gating (CTDSG), where fan relationships, content privacy, and tiered benefits are programmable and owned.

EXPLORE THE CAMMUNITY DAO ECOSYSTEM

The ecosystem consists of:

- CamuCoin,
- CamuToken,
- an open site,
- and an NFT marketplace.

It provides a versatile environment for creators, DAO token holders, and general users, emphasizing mutual benefits and community-driven development.

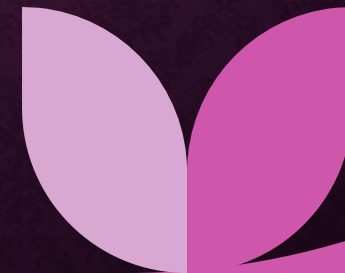

Core Contracts Deployed On Base Mainnet Blockchain:

<https://basescan.org/address/0xF5dbA67c3803833836259720f1cDFd0725468dAc>

MONETIZE CONTENT. CONTROL ACCESS. GOVERN TOGETHER.

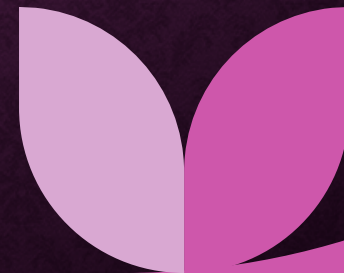

DAO token holders have voting rights in governance decisions, influencing platform development, feature implementation, and community initiatives. They can earn rewards and have access to exclusive content and premium features.

SUPPORT WHAT YOU LOVE. SHAPE WHAT COMES NEXT.

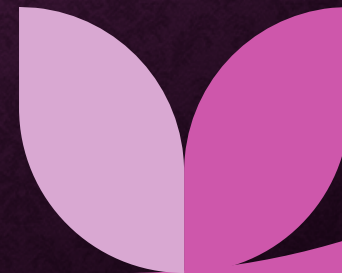

Creators can monetize their content through various revenue streams like subscriptions, tips, and NFT sales. They have control over access to their content and can engage with their audience in a secure and supportive environment.

FLEXIBLE ACCESS. CREATOR-CONTROLLED MONETIZATION.

Users have access to a diverse range of content and can support their favorite creators. They can participate in community activities, purchase NFTs, and experience high-quality, user-friendly services on the platform.

NFT MARKET: OWN, SUPPORT, AND ENGAGE

The platform is open to all, with optional gated access for creators to manage content accessibility. It ensures a balanced ecosystem where freedom of expression and content diversity are valued.

Third-party Decentralized Identifiers (DiDs)* verification integration (Fractal ID / Polygon ID) planned for adult-only Creator Token Decentralized Subscriber Gating (CTDSG).

* Use of DiDs removes the risk associated with Personally Identifiable Information (PII) retention.

TRADITIONAL SUBSCRIBER MODEL VS. CREATOR TOKEN DECENTRALIZED SUBSCRIBER GATING

Feature	Traditional Platform (e.g., Patreon, YouTube)	Camuverse Token-Gated Version
General Public Content	Public posts/videos accessible to anyone	NFTs viewable by anyone (open layer)
Members-Only Content	Followers or free subscribers	Verified Cammunity members
Paid Subscriber Content	Monthly paying subscribers (e.g., \$5/month)	Ownership of creator-issued tokens (e.g., 1 CTKN = subscriber)
Exclusive Content for Verified Adults	Platforms often avoid hosting due to legal/PII risk	Gated to CamuVerify-approved members only
Tiered Subscription Perks	Different tiers (\$5/\$10/\$25) with more perks	NFTs with metadata gated by specific token holdings

-  Decentralized equivalent of subscriber-only content
-  Creators can issue their own ERC721/1155 tokens as access passes
-  Viewers must hold the token + be CamuVerify-verified to access gated content
-  No centralized identity or subscription platform needed
-  Enforced on-chain via GatingRegistry.sol

DECENTRALIZED GOVERNANCE IN ACTION

The NFT marketplace enables the creation, listing, and trading of unique digital assets. It opens up new possibilities for content monetization and ownership, enhancing the value proposition for creators and collectors.

TOKENOMICS AND TREASURY: DESIGNED FOR SUSTAINABILITY

Community is at the core of Cammunity DAO LLC. Regular events, discussions, and collaborative initiatives foster a sense of belonging and active participation, driving the platform's continuous growth and innovation.

TOKENOMICS OVERVIEW

CamuCoin (CAMC): Utility token used for content unlocks, tips, and transactions

1% transaction fee redirected to DAO Treasury

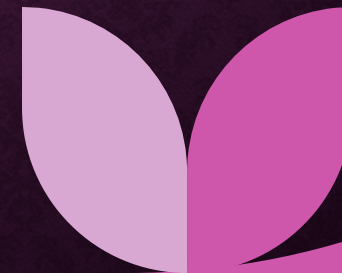

2% burn fee triggered after supply cap is reached

CamuToken (CAMT): Governance token with voting and access rights

DAO-controlled minting, with 15% monthly treasury withdrawal cap

SUSTAINABILITY AND GROWTH

Through decentralized governance, diverse revenue models, and community engagement, Cammunity DAO LLC aims to achieve long-term sustainability and growth, adapting to the evolving needs of the community and the digital content landscape.

HOW DAO GOVERNANCE WORKS

An example member proposal: Add a smart contract and website to handle phigital item sales

GENESIS CREATOR AIRDROP + VESTING SYSTEM

- 4,000,000 CAMC pre-minted and stored in VestingWrapper.sol
- Early creators receive up to 50,000 CAMC each via claim-based unlocks
- Unlocking tied to Cammunity engagement/Camuverse presence
- Protects token value while giving creators usable launch capital
- Prevents dumping and encourages real participation in the platform
- DAO treasury, LP fund, and founder wallets receive CAMC via initial minting

INFLUENCER AIRDROP REWARD UNLOCKING

#	Criterion	Logic
1*	Verification (e.g., via CamuVerify / DID)	Establishes authenticity and protects the ecosystem from bots, sybil attacks, and abuse.
2	Posting content/NFT	Shows creator intent and contribution to the platform — minimal friction, but real commitment.
3	First CTDSG Token Issuance	Incentivizes creators to initiate decentralized subscriber models, which is core to Camuverse.
4	Five CTDSG Tokens issued to unique wallets	Ensures traction: creator tokens are not just created but actually adopted. Prevents gaming with alt wallets.
5	Voting on a proposal	Ensures DAO participation and aligns reward unlocking with governance engagement.

* Free Verification via Partial Early Unlock for Registration: Influencers use a portion of locked airdropped tokens to pay for CamuVerify verification.

CREATOR SUBSCRIPTION TOKEN PRICING & MINTING

Verified creators can deploy their own CTDSG (Creator Token) using the Camuverse Creator Factory.

They set a mint price (in ETH or token) for their subscription NFT.

Verified or public users can mint the token (based on content gate), gaining access to exclusive content or perks.

No intermediaries or platforms take a cut — creator earnings go directly to their wallet.

PROPOSAL: CTDSG-GATED LIVE STREAMING DAPP

Objective:

- Empower verified creators to broadcast live, gated content using Creator Token Decentralized Subscriber Gating (CTDSG).

Features:

-  CTDSG token-gated stream access
-  Creator-controlled live sessions
-  Real-time chat + tipping in CAMC
-  Stream scheduling & analytics

Funding Requested:

- 200,000 CAMC
(includes dev bounty, infra, UX tooling)

Milestones:

- Q4 2025: MVP Launch (Access-Gated Streaming)
- Q1 2026: Tipping + Viewer Analytics
- Q2 2026: Decentralized Archiving

Outcome:

- Boosts creator engagement, CAMC utility, and ecosystem stickiness

PROPOSAL: CAMUVERSE MICROSERVICES ROADMAP

UPDATED TOKENOMICS OVERVIEW (20M CAMC PLAN)

- • Total Supply: 20 M CAMC (initial mint)
- • Anchor Price: \$0.01 per CAMC
- • Initial Liquidity: 500 K CAMC + \$5 K USDC
- • Fully Diluted Valuation: ~\$200 K
- • Treasury: 12 M CAMC (60%)
- • Creator Reserve: 4 M CAMC (20%)
- • Founders & LP Wallets: 2 M CAMC (10%)
- • Public / Early Access: 2 M CAMC (10%)
- • Liquidity growth and minting subject to DAO governance.
